PROFESSIONAL SUMMARY

Technical Operations leader with 8+ years of experience across Production Support, Product Analysis, and SaaS environments. Skilled in driving operational excellence, product stability, and reliable feature launches through data-backed validation and benchmarking. Proven track record of cross-functional partnership with Engineering, Product, and stakeholders to improve system reliability, SLA/KPI performance, and team efficiency.

PROFESSIONAL EXPERIENCE

Production Support Manager — Everstage

Dec 2024 – Present

Coimbatore, Tamil Nadu

- Diagnose and resolve complex technical issues with strong emphasis on root cause analysis, bug tracking, and resolution.
- Collaborate cross-functionally to drive product enhancements and improve user experience.
- Partner closely with the Development team to support benchmarking, performance profiling, and feature rollouts, ensuring smooth deployment and product stability.
- Own SLA and KPI management and oversee team performance metrics.
- Drive process improvement, streamline workflows, and implement automation to prioritize high-impact issues.
- Apply advanced troubleshooting methodologies and maintain detailed technical documentation.
- Engage stakeholders to ensure clarity and alignment throughout the product lifecycle.

Product Associate — Athenahealth

Aug 2024 – Dec 2024

Chennai, Tamil Nadu

- Led a team as subject matter expert in developing and refining KPIs and SLAs to measure and elevate service effectiveness across operations.
- Set strategic performance benchmarks while ensuring urgent incidents and critical escalations were managed with precision and speed.
- Proactively identified process gaps, implemented corrective actions, and tracked performance trends to enhance service outcomes.
- Collaborated with cross-functional teams to ensure seamless communication and quick issue resolution aligned with organizational goals.
- Drove initiatives that improved responsiveness, reliability, accountability, and transparency, consistently exceeding stakeholder expectations.

Senior Product Analyst — Athenahealth

Jul 2022 – Jul 2024

Chennai, Tamil Nadu

- Contributed to performance goals and enhanced service delivery effectiveness.
- Created knowledge articles for product workflows and developed technical documentation to support efficient operations.
- Partnered with cross-functional teams to gather insights, validate technical accuracy, and keep documentation current with product changes.
- Drove consistency and accountability across operational functions.

Product Analyst — Athenahealth

Sep 2020 – Jun 2022

Chennai, Tamil Nadu

- Analyzed product workflows, managed client cases, and resolved issues to enhance overall product performance.
- Conducted test workflows to deepen product knowledge and ensure functionality aligned with user expectations.
- Collaborated with cross-functional teams to provide insights driving continuous improvement and feature optimization.
- Contributed to team metrics and operational efficiency, maintaining high-quality standards for clients.

Product Analyst — Spin Technologies

Apr 2019 – Sep 2020

Bangalore, Karnataka

- Collaborated with premium clients including Jaguar, Land Rover, Range Rover, and Tata Motors on advanced vehicle tracking solutions for service centers.
- Identified, implemented, and tracked bugs, working closely with developers to ensure timely resolution and improved system reliability.

Associate Software Engineer — Accenture

May 2018 – Apr 2019

Bangalore, Karnataka

- Completed comprehensive training across programming languages, strengthening technical proficiency and coding fundamentals.
- Gained hands-on experience with manual testing and automation tools, including Selenium.
- Demonstrated strong problem-solving skills and adaptability in dynamic, fast-paced environments.

SKILLS & TOOLS

- Monitoring & Debugging: Datadog, Grafana, Sentry, Browser DevTools
- Data & API Investigation: Snowflake, PostgreSQL, Postman
- User Behaviour & Product Insights: FullStory, PostHog, Mixpanel
- Code & Dev Tools: Cursor, Windsurf
- Tickets & Documentation: JIRA, Confluence, Salesforce
- Core Competencies: Production Support, Incident Response, System Monitoring, Data Analysis, API Testing, Debugging, Process Automation, Cross-functional Collaboration
